TURKEY INDUSTRY SHIFTS TO THE WEST

Buff Turkeys

(BY C. M. SHULTZ.)

Thanksgiving or Christmas turkey, in the eastern states. will be quite ready to affirm that pera holiday piece de resistance.

Last year in the largest cities firstclass birds brought from 25 to 50 learned, at least in a preliminary way. cents per pound, and a \$5 bill was hardly adequate to secure a bird that west, where it has not prevailed to would sufficiently serve an ordinarysized family.

seven years ago, when the terrible disease of blackhead began to destroy by the eastern breeders who did not the flocks in the New England states. The ravages of this disease have become so great that in Rhode Island, very few are now being raised. The has spread to other states effects have been so disastrous that thousands of farmers in Massachusetts, New Jersey and New Hampshire, all formerly good turkey states, have practically given up the business.

This disease has invaded the west to some extent, but its ravages have trouble than that of chickens. been checked because the means of preventing it are now much better they quickly become attached to their understood than ever before, owing to attendant, it is not difficult to control vestigations started several years ago by the Rhode Island experiment station ,and supplemented by the work for the market. In this way they will of the U.S. department of agriculture

Blackhead is a disease of the liver and intestines which produces a form of dysentery and is caused by minute parasites, and called blackhead because the heads of the affected birds turn black at a certain stage of the disease.

In many cases birds die from complications induced by the presence of the disease rather than from its immediate effects.

Blackhead destroys about four-fifths of the young turkeys before they are six weeks old, and of the remaining one-fifth, according to Prof. Cooper Curtiss of the Rhode Island station. one-tenth to one-fifth die at a later

While there has not been great progress made in the control of this disease the limits of ignorance have been clearly defined, and it is believed that the scientists will, in a very short time, discover effective remedies.

The advice given by experts in the disease is to quit breeding turkeys the prize birds.

wherever it appears, and this is re Many a city family man, when he sponsible in a very large degree for comes to pay from \$5 to \$7 for his the rapid curtailment of the industry

The hope of the turkey-raising insonally he has no objection to the dustry appears at present to lie in passing of the turkey forever, even as the west, and those portions of the south which have so far escaped this dreaded disease. Breeders have now how to prevent the disease, and in the any considerable extent, farmers have taken up turkey breeding, encouraged The fact is that fewer turkeys are by the tremendously high prices that being raised every year, the decline in have prevailed during the past few the industry having started six or years and by the hope that they will be able to escape the losses suffered know how to cope with the disease.

As farmers receive about 65 cent, of the retail price of turkeys, which was once the great turkey state, there is good profit in the business, provided the birds escape disease. Turkey-raising is no more difficult throughout the east, and its ravaging than the raising of any other kind of poultry. It requires just as much, but no more trouble than should be devoted to the raising of guineafowls, well-bred chickens, or squabs. In fact, where extensive range can be secured, the rearing of turkeys is less

Turkeys are great rangers, but as the industrious and intelligent in them. They should be fed and cared for by the same person from the time they are hatched until they are ready learn to come at the call of the attendant, and follow him for long distances, from the fields to the coops,

If young turkeys are carefully handled by the same person they can be easily driven from one place to another, and when storms come on they can be quickly housed. In foreign countries turkeys are driven to market in flocks, and we once saw a flock of nearly 300 birds being driven along the highway to the railroad station three miles from the farm, where they were to be cooped and shipped to the city market.

Texas is, perhaps, today the greatest turkey state in the Union. Breeders of this state have taken first premiums at many of the national shows during the past few years, and the industry has thrived wonderfully

in the mild climate of the state. Turkeys in the southern states, where range is ample and the winters are mild, grow to an exceptionally large size, twenty-five to thirty-five pounds being a common weight for

INTERNATIONAL THE BANKS SUNDAY SCHOOL

(By E. O. SELLERS, Director of Eve-ning Department The Moody Bible In-stitute of Chicago.)

LESSON FOR FEBRUARY 2.

THE FLOOD.

LESSON TEXT-Genesis 69-12, 7:11-24.
GOLDEN TEXT-The wages of sin is death, but the free gift of God is eternal life in Christ Jesus our Lord." Rom. 6:23 R. V.

The first great fact recorded in the book of Genesis is that of Creation, which may be divided into several lesser facts. The second great fact is that of the Fall, which began with the temptation and ended with the exclusion from Paradise. In this lesson we come to the third great fact, the Flood, the account of which embraces the fifth to the ninth chapters. Chapter five gives us Noah's genealogy; six, the history of the building of the ark; seven, the occupancy of the ark; eight, Noah's departure from the ark, and nine, God's covenant with Noah.

In this lesson sin flourishes like the

proverbial green bay tree. "Every

imagination of the thoughts of man's heart was only evil continually," v. 5. When the facts are known of the won-"the earth was filled with violence." sin, God was so deply grieved in his taken by the banks. heart that he turned aside (repented) from his plan and purpose thus far, to a determination to destroy man (v. God's sight, as we see from v. 9, even is spoken of as a record yield, and this in the midst of these adverse circum- is doubtless true, but several cases stances. Environment is powerful but have been brought to notice where not all-powerful, and it is never a yields almost as large have been promatch for God's grace. We must not duced, and in different parts of the gather from this verse that Noah was faultless, but rather than he sought to conform his life to God's will and not to the standards of those among whom he dwelt. Noah gave himself to a whole-hearted service to God. crop. Wheat that would yield 40 We are told that the foundation of bushels per acre, would bring on the Noah's acceptance before God was his market 70c (a fair figure) per bushel, faith, Heb. 11:7, like his great grand- a gross return of \$28.00 per acre. Alfather Enoch, he had "walked with

450 feet long, 75 feet broad and 45 value of the land alone the best posfeet deep, built of cyprus (gopher sible start for a splendid future. Adwood) and coated with pitch. Under vertisement. the eaves of the roof was an open space for ventilation and its three decks were divided into ments.

As to the "eight souls" (I Peter 3:20) who entered the ark we need to remember that usually children and servants are understood without montion in such enumerations. We are not to infer that of all created animals two of each entered the ark. The flood certainly was not universal and hence such a miracle was uncalled

Race Swept Away.

At last the flood arrived at the exact moment prophesied. Its cause seems to be twofold, a subsidence of the ground and a downpour of rain. The Euphrates valley where this event took place fills all the necessary conditions. Subsidence would allow an inundation from the sea. Such an inundation took place in 1911 in the Yangtse valley and another in 1901 rendered more than ten million people homeless; the water rising from 50 to 90 feet. All that the account demands, however, is that a corrupt race was swept away and that God saved his righteous servant and his household. It is the privilege of every believer in God to save his household. See Acts 16:31, 2:9; I. Cor. 7:14.

The only way God could insure the purity of the race was to destroy in revocably the impure.

Skeptics have read into the story sending for a carpenter. They are feeding twice in the same place. He of the flood much extraneous matter. year in repairing buildings for the to the hogs' health, but says that it cause nearly every race under the sun takes more corn and larger feeding to has a flood tradition therefore the writer of Genesis is merely passing This feeder buys his shoats, never on a "Babylonian tradition." It is far keeping more than a dozen brood more reasonable to believe that these sows on the place, and the hogs he traditions are corrupted forms of the

For the younger pupils get the on alfalfa in the pasture and later story of the flood as told by Dean essons and tell them that the story good live questions for class discussions would be: What does it mean to walk with God? Of the four-ignorance, indifference, consent or condemnation of sin-which one must God take? What is the difference between wages and a free gift? Did Noah earn his salvacion? Is saith more than an attitude of mind? De we need more hatred of sin today?

OF CANADA

The closing of the year 1912 has brought out the usual bank statements accompanied by the addresses of the Presidents and General Managers of these institutions. Their reading is interesting as they show in a striking manner the prosperity of the country. and deal with economic matters in a first hand way. Those who know anything of Canadian banking methods know the stability of these institutions, and the high character of the men who are placed in charge. In discussing the land situation the President of the Union Bank of Canada, whose branches are to be found in all

parts of the Canadian West, said:-"A good deal has been said about speculation in land. The increase in land values has added enormously to the assets of Western business, and has to some extent formed a basis for extended credit, but this is not felt to be a drawback when the value is real and convertible. We consider that a or any one the relief it gave me in the business standing which is strengthened and enhanced by property holdings is entitled to a reasonable enlargement of credit for legitimate business operations.

It will thus be seen that the banks recognize the certain rise in the value of farm lands in Western Canada. These thoughts were crystallized into derful producing qualities of farm the lives of men, for we read that lands in the Provinces of Manitoba, Saskatchewan and Alberta, it is sim-Viewing this awful development of ple to understand the liberal stand

LIFE'S STRUGGLE WITH ILLNESS

Suffered from 16 to 45 years old-How Finally Cured.

Euphemia, Ohio. - "Because of total ignorance of how to care for myself when verging into womanhood, and from taking cold when going to school, I suffered from a displacement, and each month I had severe pains and nausea which always meant a lay-off from work for two to four days from the time I was 16 years old.

"I went to Kansas to live with my sis ter and while there a doctor told me of the Pinkham remedies but I did not use them then as my faith in patent medicines was limited. After my sister died I came home to Ohio to live and that has been my home for the last 18 years,

"The Change of Life came when I was 47 years old and about this time I saw my physical condition plainly described in one of your advertisements. Then I began using Lydia E. Pinkham's Vegetable Compound and I cannot tell you first three months. It put me right where I need not lay off every month and during the last 18 years I have not paid out two dollars to a doctor, and have been blest with excellent health for a wowoman of my age and I can thank Lydia

E. Pinkham's Vegetable Compound for it. Since the Change of Life is over I have been a maternity nurse and being wholly self-supporting I cannot over estimate the value of good health. I have now earned a comfortable little home just by sewing and nursing since I was 52 years old. I have recommended the Compound to many with good results, as it is excellent to take before and after childbirth."—Miss EVELYN ADELIA STEWART, Euphemia, Ohio.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be epened, read and answered by a woman and held in strict confidence.

RESINOL clears skin humors right away. You can't imagine the comfort the first use of it brings.

No matter how long you have been tortured and disfigured by itching, burning, raw or scaly skin diseases, just put a little of that soothing RESINOL on the sores and the suffering stops right there! Healing begins that very minute, and your skin gets well so quickly you feel ashamed of the money you threw away on useless, foolish treatments.

Prove it yourself, FREE

We send samples of Resinol with directions, free. Write today to Dept. 16K, Resinol Chemical Co., Baltimore, All druggists and general stores sell Resinol, 50c. (Large size \$1.00.) Also Resinol Soap, 25 cents.
